DETAILED ACTION

Status of Claims

1. This action is in reply to the US application with filing date 6-23-2005; the original claims filed on 10-5-2004 and amendments to the claims also filed on 10-5-2004.
2. Claims 1, 9, 10, 12, 13, 15, 20, 23-24, 26, 27, 29-32, 34, 37, 38, 40, 41, 43-45, 48, 51, 52, 54, 55, 57-59, 61-63, 65-67, and 77-80 are originally presented.
3. Claims 8, 11, 14, 19, 22, 25, 28, 33, 35, 36, 39, 42, 46, 47, 49, 50, 53, 56, 60, 64, 68, and 73-76 have been currently amended.
4. Claims 2-7, 16-18, 21, and 69-72 have been canceled.
5. Claims 1, 8-15, 19, 20, 22-68, and 73-80 are currently pending and have been examined.

Election/Restrictions

6. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1, 8-14, 73, 77; 29-41, 76, 80; 43-56; 57-60; and 65-68 drawn to computer-to-computer protocol implementing, classified in class 709, subclass 238.
 - II. Claims 15, 19, 20, 22-28, 74, 75, 78, 79; and 61-64 drawn to finance, classified in class 705, subclass 35.

The inventions are distinct, each from the other because of the following reasons:

Art Unit: 3693

7. Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different designs, modes of operation, and effects (MPEP § 802.01 and § 806.06). In the instant case, the different inventions are not usable together as they each produce different products. Invention I optimizes computer data processing whereas Invention II balances loan accounts with collateral securities.

8. Restriction for examination purposes as indicated is proper because all these inventions listed in this action are independent or distinct for the reasons given above and there would be a serious search and examination burden if restriction were not required because one or more of the following reasons apply:

- (a) the inventions have acquired a separate status in the art in view of their different classification;
- (b) the inventions have acquired a separate status in the art due to their recognized divergent subject matter;
- (c) the inventions require a different field of search (for example, searching different classes/subclasses or electronic resources, or employing different search queries);
- (d) the prior art applicable to one invention would not likely be applicable to another invention;
- (e) the inventions are likely to raise different non-prior art issues under 35 U.S.C. 101 and/or 35 U.S.C. 112, first paragraph.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse. Traversal must be presented at the time of election in order to be considered timely. Failure to timely traverse the requirement will result in the loss of right to petition under 37 CFR 1.144. If claims are added after the election, applicant must indicate which of these claims are readable on the elected invention.

If claims are added after the election, applicant must indicate which of these claims are readable upon the elected invention.

Should applicant traverse on the ground that the inventions are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
